There has been a good quantity of al-falfa sown here in the last few years, and it does splendidly, making two or three crops of hay in one season. Last season commenced cutting it on the 12th of June, and I cut three crops. After the first cutting, it will make a crop in thirty.five or forty days, if the ground is in good growing order. I commence cutting before it shows many blossoms. If it stands longer, the stock becomes hard and woody, and stock do not eat it up so clean, especially cows. Horses like the stalks better than the leaves. I have used it now for four years, and think horses will do better on it without grain than they will on timothy or blue joint hay.

THE INDEMNITY LANDS.

Hon. J. L. Arnold handed us the following letter from Senator Plumb, in regard to what are known as the "indemnity lands," which we publish for the benefit of those interested:

UNITED STATES SENATE CHAMBER, WASHINGTON, March 27, 1877.)
HON. J. L. ARNOLD, Iola, Kansas:

Dear Sir: I have to-day been informed at the Department of the Interior that the lists of the L., L. & G. Railway indemnity lands, declared forfeited by an act of Congress will be made out in about ten days, and certified to the local land offices within the district in which the lands are situated. Thirty days notice will be given of the restoration of these lands to homestead entry, after which they will be subject to such entry in the usual way. No reservation having been made in the act of Congress in favor of persons now occupying said lands, it will be necessary that the occupants be on be necessary that the occupants be on hand promptly at the expiration of the thirty days, prepared to make entry. Won't you see that those you can reach understand this necessity? The thirty days notice will be published in some newspaper, and perhaps in more than one, in your vicinity.

ITS ADVANTAGES

HOME FOR THE IMMIGRANT

Land at Pioneer Prices Without any

Among the many localities in Kansas which offer peculiar advantages to the Home-Seeker, Allen County, as regards Location, Soil, Water, Timber, Cheap Land, Convenience to Market, Facilities for Transportation, Towns, Settlements and Society, stands second to no other in the State, as a brief reference to the above mentioned particulars will show;

This county is second from the East and third from the South line of the State. It is one hundred miles southeast from Topeka, seventy-five miles south from Lawrence, one hundred southwest of Kansas City and twenty-five miles west from Ft. Scott and lies mainly within the celebrated Neosho valley.

The soil of the uplands is a black or dark red calcareous loam of great depth and inexhaustable fertility, while that of the bottoms is the black alluvial deposits usually found in such localities, and varying from four to ten feet in depth. No better soils for the successful production of all the grains, grasses, fruits and vegetables of this latitude can be found in the State.

The county is watered by the Neosho river, which flows through it from N. W. to S. E., and by its tributaries in the middle and western portion and by the Marmaton and Osage in the east. Each of these streams is skirted by a belt of excellent timber and flows through fine alluvial bottoms from haif a mile to a mile in width. Water for domestic purposes is found in springs and wells or
